BLACK CAT CAFÉ

The Courtyard, 2 Dale Road
Matlock, Derbyshire, DE4 3LT

PRESS RELEASE For immediate release

14th May 2009

Black Cat Café donates £164 to Cystic Fibrosis Trust.

The Black Cat Café in Matlock has this week donated £164 to the Cystic Fibrosis Trust. Since taking over ownership of the popular café in The Courtyard on Dale Road, Roger & Val Howarth and their staff have added all tips and gratuities to the customer donations placed into the CF Trust collection pot.

Roger Howarth commented "We would like to pass on our thanks to our customers who have so generously supported this fundraising over the last 8 months. We are pleased to be able to support the work of the CF Trust in this way and will continue to accept donations from our customers over the coming months. The CF Trust is a charity very close to our hearts and we are confident that this donation will go towards the charity's work in supporting families affected by CF and the vital clinical research required to improve the lives of those who suffer with this condition."

About the Black Cat Café

Set in a quiet courtyard off the main road, the Black Cat Café provides good quality, homely food in a warm and friendly environment. We achieve this by home producing all our cakes, casseroles and soups based on recipes inherited from parents and grandparents. We support the principles of Fairtrade and where possible source all our ingredients from local suppliers.

The café is open from Monday to Saturday every week from 8:30 to late afternoon.

About Cystic Fibrosis and the CF Trust

Cystic Fibrosis (CF) is the UK's most common life-threatening inherited disease. It causes the internal organs, especially the lungs and digestive system, to become clogged with thick sticky mucus resulting in chronic infections and inflammation in the lungs and difficulty digesting food.

The Cystic Fibrosis Trust is the UK's only national charity dealing with all aspects of Cystic Fibrosis (CF). It funds research to treat and cure CF and aims to ensure appropriate clinical care and support for people with Cystic Fibrosis.
